### "Only the People."

Our enterprising and intelligent contemporary the Literary Digest cannot be accused of that partisan bias which twists straws or shapes election inquiries so as to produce a predetermined result. It has been making a poll of Republican and Progressive preferences according to a method of its own. Taking the legislative district as a unit, the Digest has addressed its questions to the members of the Legislatures and has received from thirty-one States 1,500 replies With allowances here and there for the favorite son, nearly fourfifths of all the votes are divided among three worthies, in the followorder as here exhibited :

### An Abuse of the Right of Petition.

Independence and courage are uncommon at Washington in these trying and perilous days. We don't know who are the promoters and paymasters of the American Embargo Conference which is operating from Chicago-perhaps the Department of English language.

"We most solemnly of this sentiment to Washington. It must be telegraphed. \* \* \* Send the bills to us and a check will be mailed to you immediately."

The consequence was that the desks of Senators and Representatives were heaped high with these petitions sunposed to come from alarmed constituents acting independently or else in groups, according to their importance. Originally the American Embargo Conference endeavored by publicity and pressure upon members of Congress to stop the exportation of war material to Europe. It used money freely, but the source was not known. There was a great preponderance of German names among its sympathizers and workers, and it was naturally l regarded as an instrument of the German propaganda.

### The Secretary of the Treasury and the Bubonic Plague.

The incident at Callao is satisfac torily explained by Secretary McApoo. so far as the charge of deliberate discourtesy to the Peruvian authorities is concerned.

On a somewhat vague mission of pleasurable politics Mr. McApoo has been travelling around South America on the United States man-of-war Tennessee. The Peruvian Government made elaborate preparations to entertain his party upon its arrival from Valparaiso. There was great disappointment in Lima when the Tennessee, after a very brief stay in the port of Callao, departed for Balboa carrying the distinguished passengers for whom the festivities had been prepared. The affair was even represented as a heartless affront to one of the friendliest of our sister republies beyond the canal.

Mr. McApoo now informs the Treas-Isthmus that the centain of the Tennessee had been notified by General GOETHALS of the existence at the Zone of a quarantine against Callao. When the Tennessee reached Callao the Peruvian health officers reported to the ship's doctor the presence of several cases of bubonic. The captain of the Tennessee accordingly forbade Roosevelt ..... 275 any officers or men to go ashore; and 

Yesterday the Peruvian Consul-Gen Minnesota, New Mexico, Colorado and eral at New York published a state Wyoming, does Colonel Roosevelt's ment declaring that "the sanitary convote exceed that for Mr. Justice ditions in Peru are absolutely nor-HUGHES. A ratio of more than two mal, and are the same to-day as they to one is quite uniformly preserved were when the Hon. ELIHU ROOT visited Peru."

It is possible, of course, that Consul is in the possession of the sanitary authorities of the Canal Zone; for it is not conceivable that those very vigilant officers should wantonly or without sufficient reason impose quarantine against so important port as Callao.

### Secretary McApoo's despatch to the Treasury Department continues:
